SUMMARY

Detail-oriented Computer Science graduate seeking an **Ecommerce Specialist** position to apply my technical background in a digital retail environment. Combining knowledge of web development, database management, and user experience design with retail experience to contribute to online shopping operations and digital marketing initiatives. Eager to leverage technical skills to optimize product listings, improve conversion rates, and enhance customer shopping experiences.

EDUCATION

Bachelor of Science in Computer and Information Science, Temple University (GPA: 3.42)

Jan '21 — Dec '24
Philadelphia, PA

- Relevant Coursework: Web Development, Database Systems, Digital Marketing Fundamentals

EXPERIENCE

Freelance Full-Stack Developer

KMS STYLE INC | Philadelphia, PA

Custom Subscription Box eCommerce Platform

Jan 2026–Present

- Built a custom subscription-based eCommerce platform for businesses selling limited, non-replenishable inventory, eliminating overselling through transactional stock control.
- Developed tier-based subscriptions (Bronze/Silver/Gold) with box-building logic, finite lifecycles, and automated inventory-based subscription termination.
- Integrated Stripe payments with webhook validation and automatic inventory rollback on failed transactions.
- Implemented an AI customer assistant and a real-time analytics dashboard tracking customer behavior, revenue per tier, and inventory burn rate.

E-commerce Specialist

ZMO | Bridgewater, NJ

Nov 2025 – Present

- Managed day-to-day e-commerce operations across Shopify, Amazon Seller Central, and Walmart Marketplace for children's products including plush toys, squishies, and apparel
- Built and launched a new Shopify store from scratch, including store setup, theme customization, product/collection configuration, payment and shipping settings
- Created, optimized, and maintained accurate product listings, ensuring consistency across platform
- Maintained inventory tracking systems and spreadsheets to ensure real-time stock accuracy and prevent overselling of non-replenishable inventory
- Supported the setup and optimization of Google Ads campaigns, including keyword selection, ad copy refinement, and basic performance tracking
- Applied on-site SEO best practices for Shopify, including meta titles/descriptions, product keywords, image alt text, and clean URL structures
- Assisted with order issues, customer inquiries, and returns, maintaining high customer satisfaction standards
- Helped identify and report intellectual property violations while ensuring platform policy and brand compliance

Full Stack Developer Intern, [Link](#)

Break Into Tech | Philadelphia, PA

May '25 – Sep'25

- Developed an interactive SQL learning platform using React, enabling students to practice queries on AI-generated datasets
- Implemented browser-based SQL functionality with sql.js, allowing real-time query execution without backend dependencies
- Designed and integrated Claude AI prompts to generate realistic SQL schemas and sample data based on user requests
- Built Cloudflare Workers to facilitate secure API communication between the frontend application and Claude AI
- Collaborated with an AI systems engineering intern to integrate error coaching functionality that explains SQL errors in plain English
- Deployed the application via Cloudflare Pages and configured iframe embedding into the main company website

Language Tutor

Temple University | Philadelphia, PA

Aug '23 — Dec '24

- Facilitated bilingual communication skills in Hindi and English, enhancing language proficiency.
- Received commendations for exceptional verbal and grammatical skills, significantly improving students' conversational abilities and test scores.

CERTIFICATIONS

[Programming Foundations with JavaScript, HTML and CSS](#), Duke University

PROJECTS

GaiNS.ai (AI-Powered Workout Assistant), Temple University [Link](#) Jan '24 — May '24

- Designed responsive UI/UX for a web app integrating YouTube video thumbnails and chatbot responses.
- Used JavaScript and custom CSS to craft visually engaging and user-centered layouts.
- Focused on accessibility, color theory, and user flow in UI decisions.

Mobile Web Browser Project (Android Application), Temple University [Link](#) Aug '24 — Dec '24

- Developed a feature-rich Android browser in Kotlin with tabbed browsing and intelligent URL correction
- Implemented RecyclerView for efficient memory usage during smooth scrolling of bookmarked sites
- Utilized ViewPager2 and TabLayout for intuitive navigation between multiple browsing sessions
